

814 Enrollment Request Sample
 (Based on v5.0 of the 814 EDI Standard, dated 1-1-09)

Data	Description
ST*814*000000001!	Header segment identifying the transaction set and control number. Note that there will be one 814 for each enrolled POD.
BGN*13*0001*20020329!	Beginning segment identifying this as request #0001 created on 3/29/02.
N1*8S*Portland General Electric*9*0079090540000!	Identifies the Utility and its DUNS+4 number.
N1*RS*XYZ SCHEDULER*9*9876543214321!	Identifies the Scheduler and its DUNS+4 number. Note that Scheduler information must be provided on every enrollment, even if the ESS does their own scheduling.
N1*SJ*ABC SERVICE SUPPLIER*9*1234567891234!	Identifies the ESS and its DUNS+4 number.
LIN*01*SH*EL*SH*CE!	Identification segment indicating that this involves a request to obtain electric service, and is related to customer enrollments.
ASI*7*021!	Action or status indicator segment that identifies this as an enrollment request.
REF*12*00000555500001239!	Specifies the PGE-assigned Customer account number. The account number consists of the 9-digit customer number, the 7-digit premise number and a check digit. Leading zeroes must be used to format the account number.
REF*11*ESS9999!	Specifies the ESS-assigned Customer account number. The ESS account number can contain formatting characters like dashes if so desired by the ESS. The ESS account number will be returned in the format in which it is sent. PGE will send the REF11 on all information exchanges with the ESS.
REF*BLT*DUAL!	Specifies the billing option the Customer has chosen.
DTM*007*20020501!	Specifies the requested effective date. The effective date will be the date of the customer's next meter read cycle. Once the enrollment request has been accepted, the ESS may submit an 814 change request for a different effective date.
NM1*MQ*1*Customer Name!	Identifies Customer name.
N3*1000 JOE CORP WAY!	Identifies Customer address.
N4*MEDFORD*OR*76542!	Identifies Customer address (extended information).
NM1*MQ*2*****91*173246879!	Specifies the PODID for the service being enrolled.
REF*MG*AB12345678!	Meter ID is the concatenation of the meter manufacturer code and meter serial number.
SE*17*000000001!	Ending transaction segment identifying the number of segments and the control number.
