

# Reliability & Equipment Maintenance

---

We can provide all your electrical equipment maintenance needs, including repairs and outages. We'll start with a detailed assessment and develop a customized maintenance program.

## Benefits

- No need to hire and train high-voltage electrical personnel or keep expensive parts inventory
- Avoid lost revenue due to breakdowns and service interruptions
- Prevent outages by identifying needed repairs before equipment fails
- Increase equipment life expectancy and reliability
- Improve efficiency, quality and safety

## Resources

- Full-service contractor (design, construction, installation, repairs, maintenance, outages)
- Advanced diagnostic technologies
- Parts inventory in stock available for rush orders
- Portable substations and transformers available for lease
- Flexible scheduling
- 24/7 outage and emergency service available

## Substation, distribution & transmission maintenance

Reliability is one of the most important features of your electrical system. We keep you operating with a range of inspections and preventative maintenance services associated with a wide range of high-voltage equipment.

## Reliability programs

Keep your equipment running reliably by identifying potential issues before they become problems. Our preventative and diagnostic practices use state-of-the-art technology, including:

- Infrared scanning
- Animal mitigation
- Oil testing and filtration
- Dynamic and static cable testing
- Battery testing

Call 503-464-7111 to learn how Portland General Distribution Services can develop a customized service package to increase your reliability and reduce maintenance headaches.

## Need emergency services?

Call 503-464-8000 for assistance 24 hours a day.
