

Downstream Migration Maze

Sarah the salmon has spent a happy year growing in her freshwater home – the Metolius River – but she’s starting to feel ready for an adventure. Now that she’s a *smolt*, she wants to begin her journey to the Pacific Ocean. Help her find her way from the Metolius to the fish collection facility in Lake Billy Chinook (known as the Selective Water Withdrawal). Here, she will be loaded into a truck, driven around three dams, and released into the Lower Deschutes River. From there, help her swim to the Columbia River and finally out to the ocean.

Start: Metolius River

Finish: Pacific Ocean
