Want to prevent injuries and hazards when working with and around electricity? This course will help you understand safe workplace practices, including the new 2018 version of NFPA 70E®, IEEE, NEC and OSHA requirements. Walk away with a list of actions to improve worker safety.

Registration deadline is two weeks before the date of the course.

**This class will help you:**
- Understand the hazards of working with and around electricity
- Identify and avoid potentially hazardous conditions
- Apply latest standards and practices, including NFPA 70E tables, lockout/tagout and Energized Work Permits
- Distinguish between “qualified” and “non-qualified” personnel
- Review proper system installation/maintenance for worker safety
- Select, apply and maintain personal protective equipment (PPE)
- Work safely with new technologies

**Who will benefit?**
- Electricians & engineers
- Management and maintenance personnel
- Safety personnel
- Electrical contractors
- Repair technicians

**Instructor**
Gary P. Larkins, President, Advanced PowerSolutions/PowerSafetyPRO™
Gary is a licensed Electrical Supervisor with over 25 years experience in power system analysis, testing, design consultation, training & commissioning. He is the primary author of the PowerSafetyPRO™ Electrical Safety Program template, used by organizations across the US as the basis of their written electrical safety program.
