

Portland General Electric
121 SW Salmon Street · Portland, Ore. 97204

Thursday, May 23, 2019

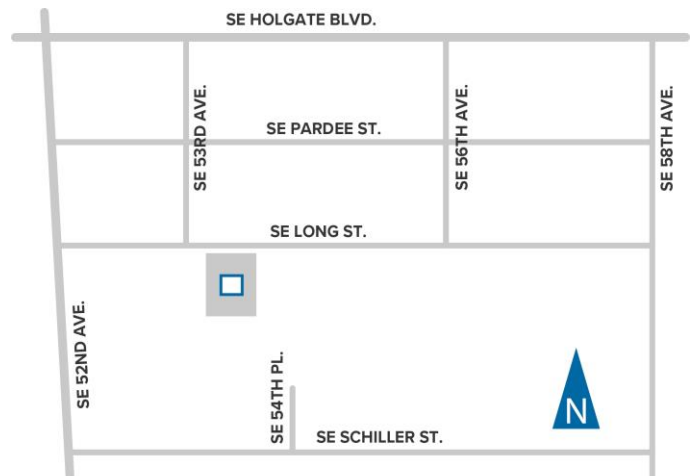

Hello,

As we work toward Oregon's clean energy future, we're strengthening the energy grid to make it smarter, more efficient and more reliable for you. Among our many projects, we're planning to expand and upgrade our Arleta substation, located at 5316 SE Long St. (*see map below*). The upgrade will increase system reliability, help prevent outages and meet the demands of growth in the surrounding area.

In addition to installing new equipment at the substation, we're proposing to expand the substation yard and move the fence in the northwest portion of the property to accommodate the equipment and improve safety. We hope to begin construction in fall 2021.

Currently, we're working with the City of Portland to obtain the necessary regulatory review and approvals for this project. The first step is a pre-application meeting to initiate the land-use permit process. If you're interested in understanding the proposal in more detail, you're welcome to attend this pre-application meeting, or you can contact us directly with any specific questions that you may have. The meeting will be held:

Thursday, June 6, 2019, from 8:30 a.m. to 10 a.m.
City of Portland Permit Center
1900 SW 4th Ave., 4th floor
Portland, OR 97201

ARLETA SUBSTATION PROJECT

 SUBSTATION

Please note that this will be an informational meeting and is not intended to take the place of a public hearing before the Planning Commission. If you wish, you'll have an opportunity to present testimony to the commission when the hearing is scheduled.

If you have any questions, please call us at 503-612-3730 or visit portlandgeneral.com/arletasubstation. We'll keep you updated as this project progresses.

Sincerely,

PGE Property Services
