

# DIVISION ST. PROJECT

As part of the Division Street Project, PGE is partnering with TriMet to install new power and communication lines to connect to their upgraded bus stops. To make room for the TriMet upgrades, we are moving utility equipment, including poles and lines. To safely complete this work, we need to briefly turnoff power to some customers along the route. If you will have an outage, we will send a follow-up notice with the expected date and time.

## PGE UPGRADES

- 1 Additional room for future upgrade
- 2 New location and size of utility pole
- 4 New underground power and communications lines
- 6 Previous location and size of utility pole

## TRIMET UPGRADES

- 3 New underground utility box
- 5 TriMet reader board
- 7 Hop Fastpass terminal
- 8 New upgraded bus shelter
- 9 New utility cabinet
