

Portland General Electric
121 SW Salmon Street · Portland, Ore. 97204

June 27, 2019

Hello,

As we work toward Oregon's clean energy future, we're strengthening the energy grid to make it smarter, more efficient and more reliable for you. Our efforts include an important, multi-year Hillsboro reliability project that will involve upgrading power lines and substations throughout the area. One of our first proposed projects will be updating our Main substation, located at 225 NE 24th Ave. (see map below). The upgrade will improve reliability and resiliency to help prevent outages and meet the demands of growth in the surrounding area.

In addition to installing new equipment at the substation, we will expand the existing fence line 35 feet to the south, within our property, to accommodate the new equipment and improve safety. We'll also add additional landscaping and screening around the substation. We plan to begin construction in January 2021.

If you would like to know more about the improvements we're proposing for the Main substation, and other steps in our Hillsboro reliability project, please join us for an informational meeting:

Thursday, July 11 at 6:30 p.m.
Shute Park Library, meeting room
775 SE 10th Ave.
Hillsboro, OR 97123

If you have any questions, please call us at 503-612-3730 or visit portlandgeneral.com/mainsubstation. We'll keep you updated as this project progresses.

Sincerely,

PGE Property Services
