

Upgraded power lines coming to the Argay neighborhood

We'll be in your neighborhood soon with the Rossi project, to make improvements to your electric service by replacing old underground power lines.

The new lines will need fewer repairs, are more reliable, will improve system operations and prepare the grid for smarter technologies. Look for us in your area based on the map below.

As always, safety first

Safety is our top priority for every construction site. When electrical equipment or trenches are exposed, crews will be on-site at all times. When crews are off-site at night or on weekends, all electrical equipment, trenches and potholes will be covered and barricaded. Please stay away from any electrical equipment and cables, and make sure children know to never touch any equipment.

FAST FACTS

- Construction will start in February and may last several weeks in any single location.
- Crew Hours: 7:30 a.m. to 5 p.m., M-F.
- If we need to briefly disconnect your power, we'll leave a notice on your door at least 48 hours in advance.
- Crews may be from PGE or Potelco, one of our contractors. They will all carry identification.
- Construction will involve digging in streets, sidewalks, planter strips and some yards. We'll restore these as quickly as possible. We'll also provide on site traffic control to minimize delays.

We appreciate your patience during the construction. Learn more about this improvement project at PortlandGeneral.com/Argay or call us at 503-612-3730.
